Public Service Announcement from CGG:

CGG is performing a seismic survey within the City of Big Spring and surrounding areas. This will involve surveying, placing sensors on permitted properties, and utilizing vibroseis trucks on City streets. All personnel will be wearing hard hats and orange vests, and will be from either Pathfinder Navigation or Geokinetics. We will have third party monitoring to ensure minimal impact from our operations.

This is a CGG sponsored activity, and any questions or concerns should be addressed to our local office at 210 West 3rd St, Big Spring, Texas. Our local phone number is 432-271-2577.
